- Language: C, C++, Python, Visual Basic(.NET)
 - Framework: HTML, CSS, Bootstrap
 - Tools/Platforms: MySQL, WordPress, Vs Code, .Net
 - Soft Skills: Time Management, Decision-making, Problem-Solving Skills
-

INTERNSHIPS:

- **THDC India Limited:**
 - Work on .NET (MVC) real time projects and create an Employee Database management System using .NET and MySQL
 - For the Database I used MySQL workbench so the data can be easily access and be user friendly[2nd June 2025 — 18th July 2025](#)
 - **The Institute of Computer Accountants (ICA), Rishikesh:**
 - I was involved in Ai based Python project
 - Learn new libraries in python like (Tkinter , Scikit-learn, NLTK)
 - Create few projects like Ai chatbot, Real-Time Emotion Detection[21th May 2025 — 5th July 2025](#)
 - **Sysfuture Technologies:**
 - Work on WordPress and building the website for the company and learning new things
 - Getting the expenses how the manage the time and how to work professionally
 - It was great training for the 6 months in the professional company and getting expenses from them[15th January 2026 — 14th July 2026](#)
-

PROJECTS:

- **Employee Database Management System using .NET And MySQL.**
- **Resume Checker using Html, CSS and JavaScript.**
- **AI Based Text Speak & Voice Weaver (To help disable people)**
 - It will make the life easier for the disable people and can communicate easily
 - Text to speak convert the text to voice so who can't speak can easily communicate with others
 - Voice Weaver helps in voice to text so the blind guy can speak the text and the deaf person can read it
 -
- **Real-Time Emotion Detection (Python)**
 - Detect the face emotion of the person and tells the emotion of that person
- **Fake-News-Detector**
 - It will help the users to get the real news not the fake ones out of 100th Fake news
 - Right now, I have used the dataset of real and fake news and if I connect the Api and train it properly it can run on real time and tell the real news and acquires rate is 78.98 %
